Experienced software developer with 3 years of hands-on experience seeking a dynamic work environment that values collaboration and personal growth. Highly adaptable to diverse technologies and dedicated to ensuring success for both the company and individual growth.

Work History

2020-12 -
Current

Front End Developer

Two Maids & A Mop Franchising, Birmingham, AL

- Expertly developed and managed custom Next.js website, resulting in a surge in lead generation and improved SEO, lightning-fast page speeds, and exceptional user experience for over 100 Two Maids franchise locations.
- Successfully executed the development and introduction of the Tip functionality, leading to a remarkable financial gain of over 1 million dollars for employees, positively impacting retention and compensation.
- Implemented three innovative React projects, leveraging React, JavaScript, HTML, and CSS, for internal company use, including a real-time map displaying user and location data with crucial business metrics, a competitive leaderboard for franchise locations, and a photo gallery.
- Provided ongoing maintenance and improvement to custom scheduling software utilizing Python, Django, and APIs, optimizing UI and resolving issues within the legacy codebase.
- Efficiently integrated new third-party scheduling software into the Next.js website, ensuring seamless service for franchise locations during the transition process.
